January 4, 2006

Montgomery County, Virginia –

Polymer Solutions Incorporated (www.PolymerSolutions.com) has announced that the company will invest approximately \$2.2 million in an expansion to the Blacksburg Industrial Park. The company will construct a multi-story 20,000 square foot building to serve as a corporate headquarters and to house analytical instrumentation, synthesis, and wet chemistry laboratories for domestic operations. Construction on the building will begin by June 2006, and the building should be operational by April 2007. The company currently has 14 employees, and this expansion will create at least six new jobs.

POLYMER (SOLUTIONS)_x

Polymer Solutions Incorporated is an independent laboratory that provides chemical analysis, physical testing, and research and development services for industrial and governmental clients. The company has nearly 20 years of comprehensive experience concerning polymer systems, and has been involved in polymer analysis and testing for automotive, medical, construction, electronics and sporting goods industries representing many technology areas.

The Montgomery County Industrial Development Authority is selling the 2.228 acre, Lot 7C to the company.

According to a statement from Polymer Solutions Incorporated President Dr. James Rancourt, “The new facility located in the Blacksburg Industrial Park will allow Polymer Solutions Incorporated to increase our efficiencies, increase our capabilities, and add additional employees. We are very excited to continue to grow in Montgomery County.”

Gary Creed, Chair of the Board of Supervisors, said “the Montgomery County Board of Supervisors is very encouraged by Polymer Solutions’ decision to expand in Montgomery County. Montgomery County’s Economic Development Strategic Plan emphasizes the retention and expansion of existing technology oriented businesses. Polymer Solutions Incorporated is a perfect example of one of the County’s targeted industries and is very important to our growing technology community.”
