

The Road Atlas is prepared by Montgomery County Planning & GIS Services Department and is published primarily as a service to assist county government, our citizens and visitors.

Montgomery County Planning & GIS Services provides the data on these pages for your use "AS IS". Data and maps are obtained from many different sources, departments, offices, our Towns, and agencies.

All maps & data shown in this atlas are for illustration purposes only and should not be used for site-specific decision making, financial or other reasons. Montgomery County Planning & GIS Services makes this information available with an understanding that it is not guaranteed to be accurate, correct, or complete. Any conclusions drawn are the responsibility of the end user. Every effort has been made to ensure accuracy, correctness, and timeliness, however Montgomery County Planning & GIS Services assumes no responsibility for errors or omissions even if Montgomery County Planning & GIS Services is advised of the possibility of such damage.

While the data compiled for use in the atlas is subject to Virginia public records statutes, and is available for free from our website for personal use, any commercial use of the artwork is reserved and may not be reproduced for distribution or resale without the express written authority of the Montgomery County Board of Supervisors.

Please contact Montgomery County Planning & GIS Services at (540) 394-2148 or [montmap@montgomerycountyva.gov](mailto:montmap@montgomerycountyva.gov) to report any errors or omissions.

iGIS is a free service to our citizens and visitors. The information available includes tax parcels, real property ownership and assessed values. Other information may be accessible using the website. Map and database information is believed to be accurate but is not guaranteed. The site is available 24 hours a day, but not guaranteed. The information is updated on a regular basis. From time to time the website will be updated and layers may be added or deleted. During this period of time, the website may not be accessible.

## THE MONTGOMERY COUNTY E911 ROAD & STREET ADDRESSING SYSTEM

The Montgomery County E911 Addressing System uses a uniform grid with an origin point located approximately in the center of the county. Using this origin point the county is divided into 4 quadrants with right angle north/south and east/west lines. Road & street addresses are assigned and increase outward from this origin point.

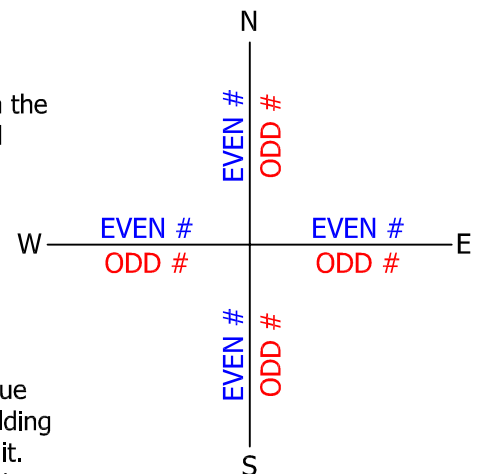

### GENERAL ADDRESSING RULES FOR MONTGOMERY CO. ROADS

Even addresses are on the NORTH sides of East/West roads and odd addresses are on the SOUTH sides. On North/South roads the even numbers are on the EAST sides and odd numbers are on the WEST sides. These rules can vary with non N/S or E/W roads.

Addresses are generally assigned based upon a 25 foot interval as measured along the centerline of a road relative to the position of a structure's access point (such as a driveway or path), the block number range, and its intersection with the road.

Multi-family structures are addressed from either a common or separate entrance. Common entrance multi-family structures are described as having more than one unique unit in a structure sharing a common outside entrance. For addressing, a common building entrance receives its number as any single structure with an apartment or business unit. In separate entrance multi-family structures, each dwelling or business unit is assigned an address with respect to its relative position along a road or street.

Mobile home parks are assigned a unique address with lot designations taking the place of individual addresses. Corner lots are assigned addresses from the road or street that the principal entrance faces.

### County Address Numbering Examples

(Note: Town numbering is not the same as Montgomery Co. Please contact Towns for their specific street addressing methods.)
